

Product Information

AVENO ePWR MBe Fluid

0002-001004

Description

AVENO ePWR MBe Fluid is a synthetic oil specially developed for vehicles in the EQ series, eSprinter and eVito of Mercedes-Benz AG. Selected additives provide good electrical resistance and dielectric properties. The unique formulation protects the electric motor due to its anti-wear, anti-foam and anti-corrosion properties.

Instructions for use

AVENO ePWR MBe Fluid lubricates and cools the electric motor EM780 (front and/or rear) of the models EQA, EQB, EQC, EQV, eSprinter and eVito when the specification MB 236.24 is required. It is recommended to rinse with AVENO ePWR MBe Fluid before final filling with AVENO ePWR MBe Fluid. The operating instructions of the manufacturers must be observed.

Properties

- high oxidation stability
- excellent material compatibility
- excellent hardware protection
- very high copper corrosion protection
- excellent electric motor compatibility
- low wear due to metal entry

Technical specifications

Properties	Data	Unit	Testing under
Kinematic Viscosity at 100°C	7.1	mm²/s	DIN ISO 51562-2:1988-12
Viscosity Index	176		DIN ISO 2909:2004-08
Appearance	YELLOW		VISUELL
Density at 15°C	849	kg/m³	DIN EN ISO 12185:1997-11
Pour Point	-63	°C	ASTM D 7346:2015
