

Product Information

AVENO Diesel CleanUp

0002-300001

Description

AVENO Diesel CleanUp is a fuel additive for all diesel engines to clean the diesel system and increase the operational reliability and economy of diesel engines. of diesel engines. It binds water in the tank and fuel system to form a combustible emulsion, cleans the injection system and thus ensures low-soot and particle-reduced combustion. and particle-reduced combustion. AVENO Diesel Cleanup reduces nailing and uneven idling.

Instructions for use

AVENO Diesel CleanUp is added to diesel fuel. It can also be used in bio-diesel or mixtures of diesel fuel with bio-diesel. Cleaning process via the tank: The contents of the can are sufficient for approx. 80 liters of diesel fuel. (Mixing ratio: 1 : 250). Depending on the tank filling fill the tank. Repeat the process after 2000 km. Cleaning process via the filter housing: Always replace the filter! Fill the filter housing completely with AVENO Diesel Cleanup and bleed. Start the engine and let it run at various engine speeds until the additive has been used up (max. 2000 rpm).

Properties

- Cleaning the injection system
- Binding of water in the tank and fuel system
- Production of full engine power
- Exact fine atomization of the diesel fuel
- Reduction of smoke development
